Fluctuations in the skin caused by hormonal aging frustrate women. Over time the body's production of estrogen declines causing the skin to become increasingly dry and lose elasticity and suppleness.

gloTransition Skin Therapy Kit helps to restore vibrance and strengthen the skin to provide relief from these skin concerns.

The gloTransition kit contains:

- gloPeptide+Defense

A serum to revive the appearance of stressed, fatigued skin with potent anti-aging ingredients.

- gloRefreshing Mist

A cooling mist with an invigorating burst of hydration.

- gloConditioning Restorative Mask

A cooling treatment that provides the necessary nutrients to the skin to hydrate, soothe and strengthen.
